COMPANY PROFILE

“Our corporation’s most valuable asset is its people”

We are guarantee of quality and trust

Established in 2005, GOODWIND is dedicated to the professional manufacturing of generator sets. Our company emphasizes the spirit of craftsmanship and is committed to internationalization.

Our Mission:

To forge excellence through dedication and to lead the future with innovation. At GOODWIND, we uphold the spirit of craftsmanship, striving for the highest quality in every generator set we produce. Our commitment to quality is the cornerstone of our brand.

Our Products:

We specialize in the production of various types of generator sets, including diesel, gasoline, and gas-powered units, which are widely used in industries, businesses, and residential applications. Our products are recognized for their high performance, stability, and efficiency in the market.

Our Team:

We pride ourselves on having a team of experienced professionals with a strong track record in the power generation sector. Each member of our team contributes value at every link of our business chain, ensuring that our products meet the highest standards.

Our Internationalization:

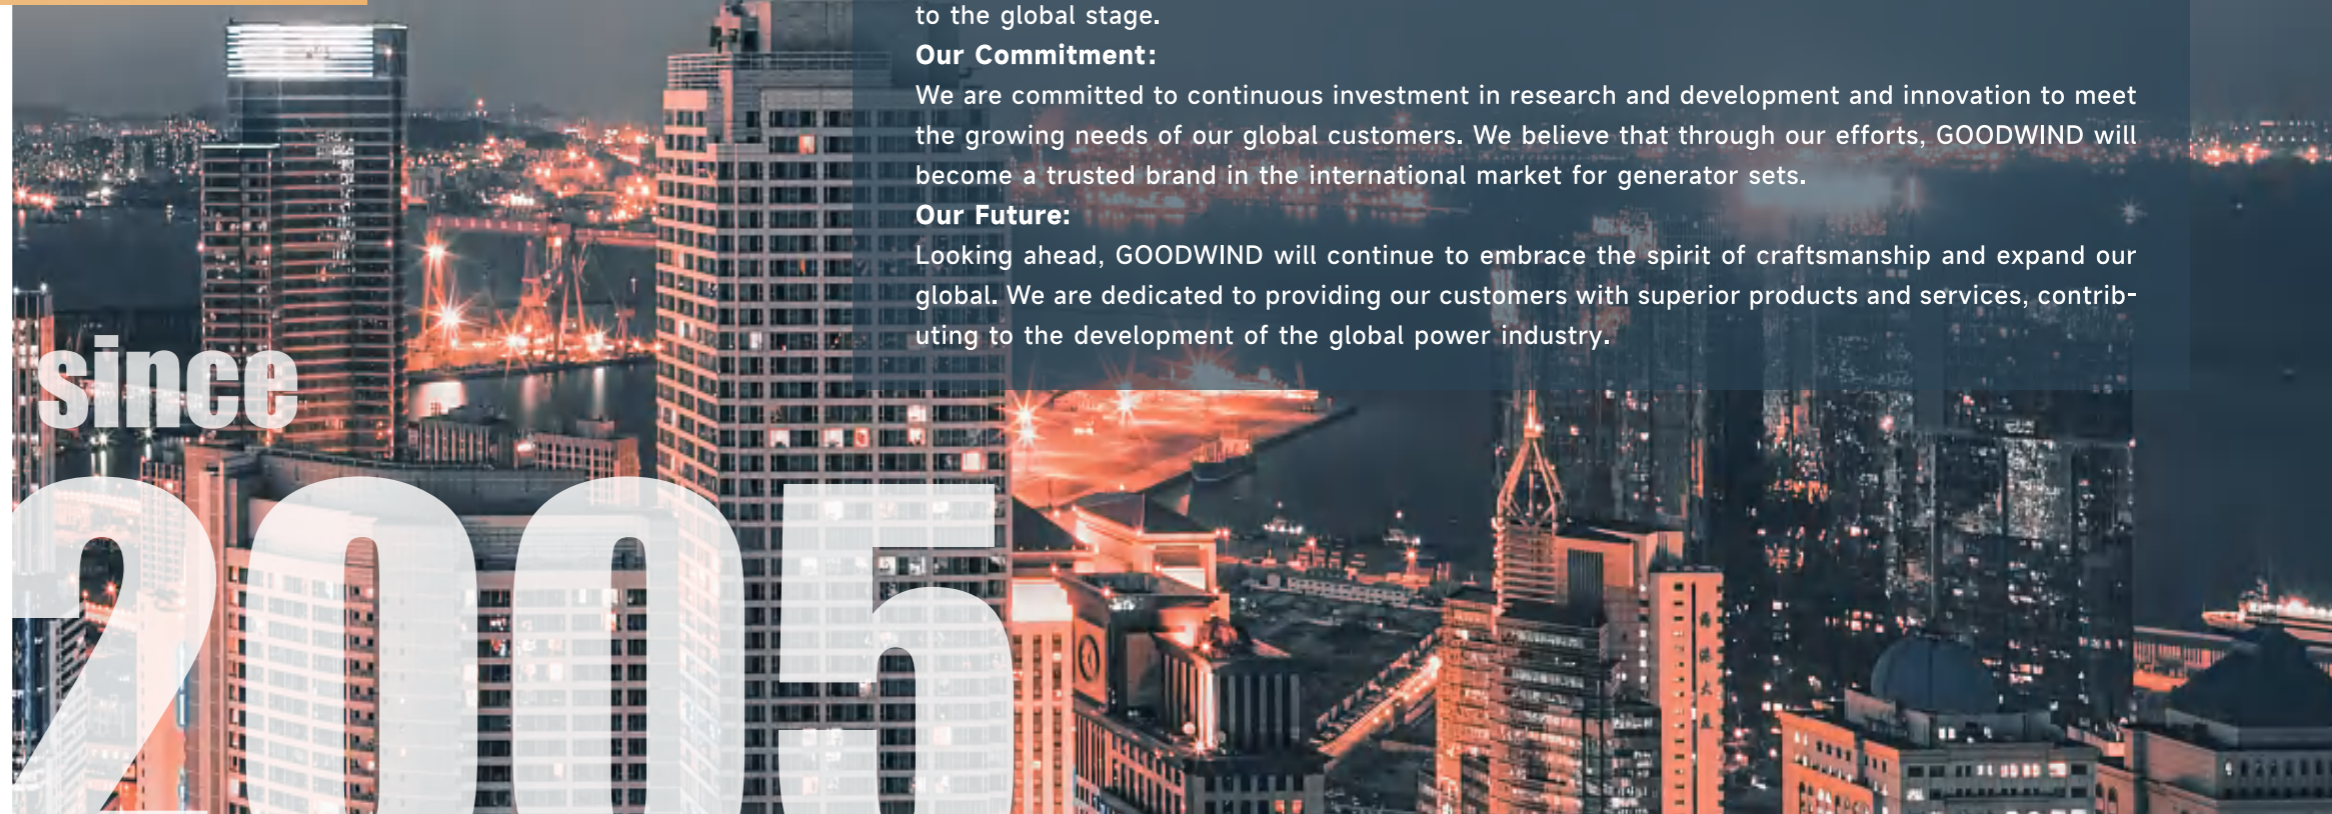

As part of our growth strategy, we actively expand into international markets. Our products are exported to various countries and regions worldwide. We have established solid cooperative relationships with international partners, aiming to bring "Made in China" high-quality generator sets to the global stage.

Our Commitment:

We are committed to continuous investment in research and development and innovation to meet the growing needs of our global customers. We believe that through our efforts, GOODWIND will become a trusted brand in the international market for generator sets.

Our Future:

Looking ahead, GOODWIND will continue to embrace the spirit of craftsmanship and expand our global. We are dedicated to providing our customers with superior products and services, contributing to the development of the global power industry.

CLASSIC CASES AT HOME AND ABROAD

Goodwind SOME PARTNERS

China National Nuclear Corporation

2 sets GW1100, 1 set GW1000, 2 sets GW400

STATE GRID

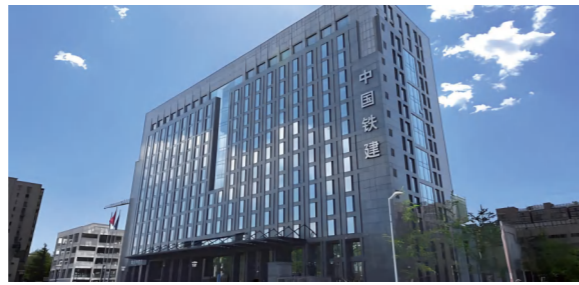

5 sets GW1000, 10 sets GW800, 13 sets GW450

CHINA POLY GROUP CORPORATION

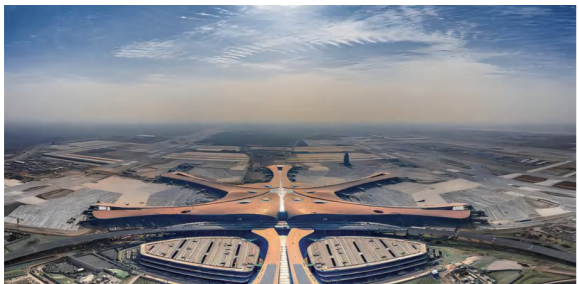

7 sets GW1300, 16 sets GW1000, 82 sets GW800

CHINA RAILWAY CONSTRUCTION GROUP CO.,LTD.

4 sets GW1200, 5 sets GW1000, 8 sets GW900

Beijing Daxing International Airport

3 sets GW1600, 2 sets GW1000, 4 sets GW120

JD Logistics

2 sets GW1600, 1 set GW1500, 5 sets GW1000

Shenzhen Gas

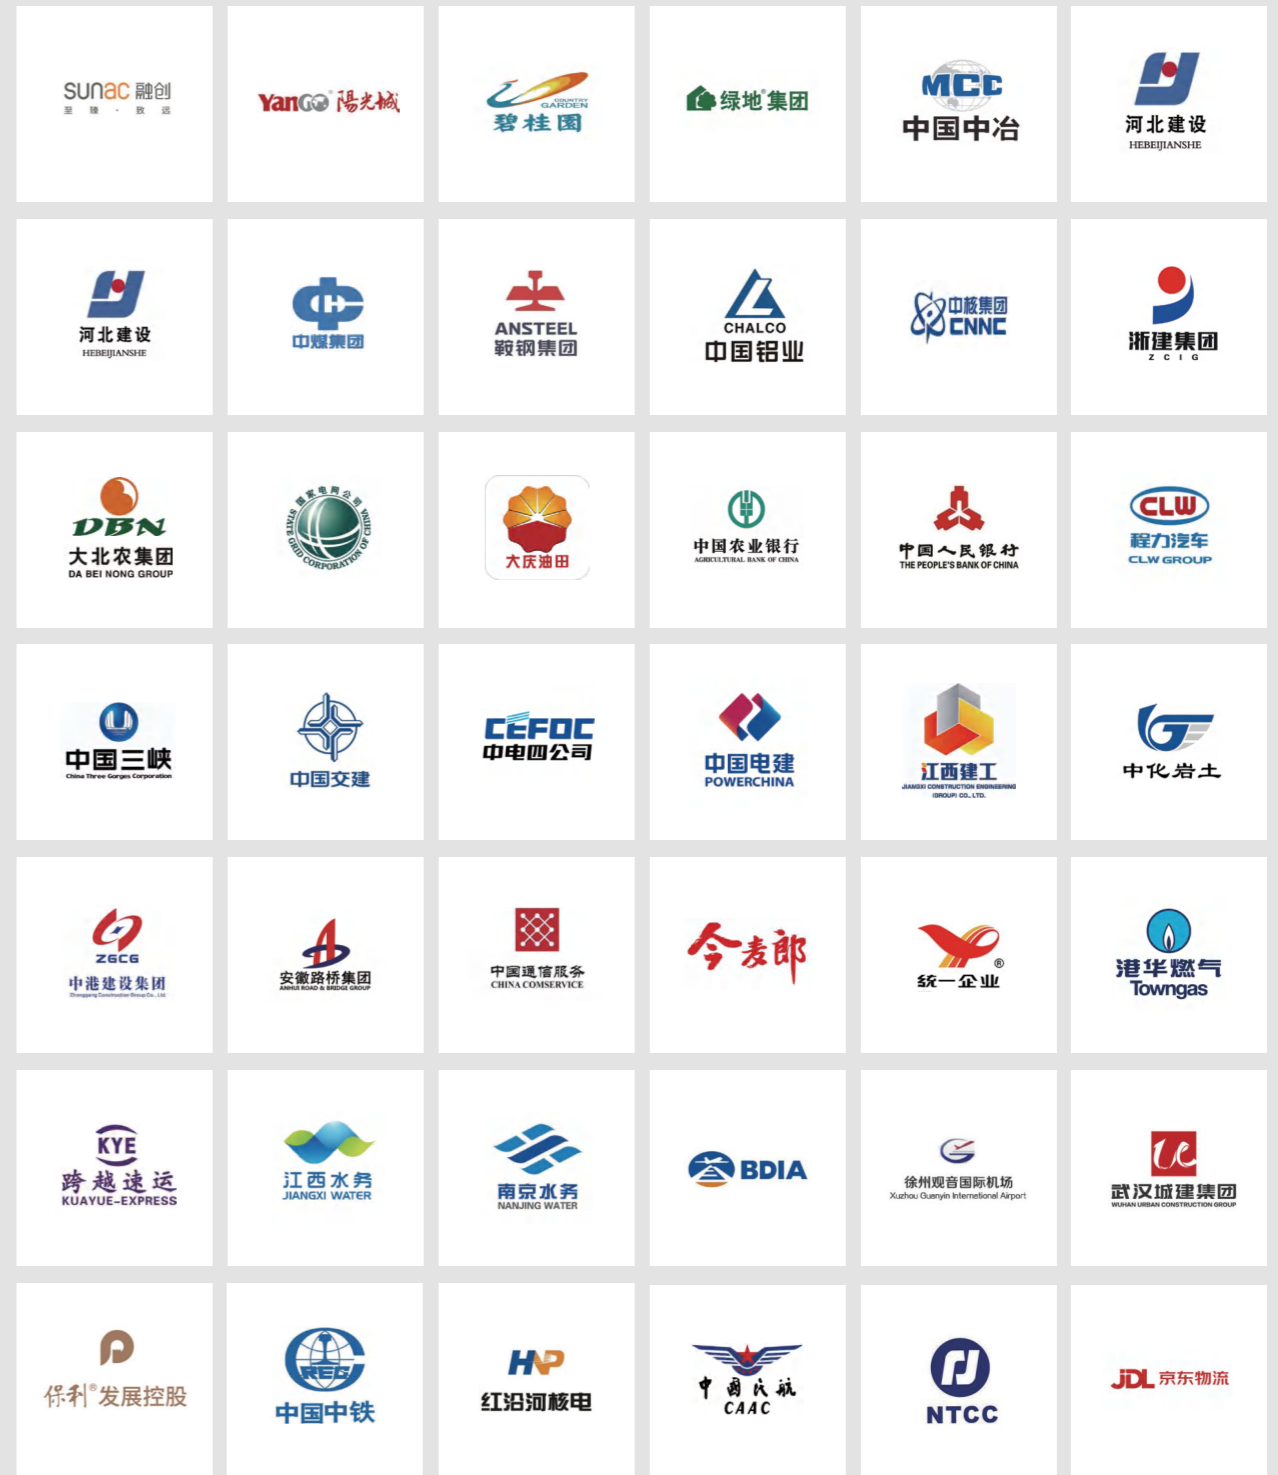

3 sets GW800, 5 sets GW400, 2 sets GW200

DA BEI NONG GROUP

7 sets GW600, 12 sets GW400, 8 sets GW350

PRODUCTION TECHNOLOGY AND PROCESS

- 1** Galvanized sheet is a steel sheet that has been treated with zinc to prevent corrosion. Galvanized sheet is suitable for outdoor applications because galvanized steel is more corrosion-resistant than ordinary steel, which means it will last longer when exposed outdoors.
- 2** Han's Laser H Series high-speed fiber laser cutting machine, with cutting efficiency increased by more than 20%, is stable and reliable, and can meet the complex and high-performance application scenarios of various industries and meet the needs of customers.
- 3** Jinfangyuan CNC bending machine under TRUMPF of Germany, is intelligent and easy to operate, stable and reliable in operation, and has high process accuracy. And it is equipped with a powerful CNC system design and an intuitive programming system to make operation simple.
- 4** Dilter through-type shot blasting machine, through the shot blasting machine, throws spherical projectile particles to the surface of the metal workpiece, quickly and efficiently removes rust and polishes the surface of the workpiece, so that the later paint spraying has more adhesion.
- 5** The painter will scrape, polish and spray the base of the generator set, which will protect the surface of the product from rust and corrosion, and can also play a decorative role, making the product look more beautiful.
- 6** 6S management refers to sorting, reorganizing, sweeping, cleaning, safety, and literacy, creating an excellent working environment for employees, improving employee quality, and ensuring the safety and efficiency of the working environment.
- 7** The test steps of diesel generator sets include manual start, manual parallel power supply, operation safety management, protection function and shutdown, etc., to ensure that every generator set leaving the factory has undergone rigorous testing.
- 8** The intelligent test system of the generator set can accurately test the output power and load capacity of various generator sets, mainly testing all electrical parameters of the generator set including dynamic parameters, and generating chart curves and test reports.

DESIGN AND MANUFACTURE

Applied technology and robotics guaranteeing the highest level of precision and quality.

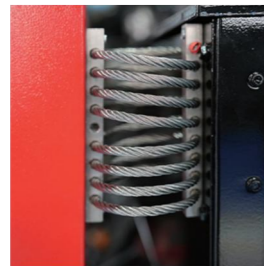

OPEN SKID GENERATOR SET

Designed for those applications that require the equipment to be installed inside the facilities. Compact units that guarantee more power in less space allowing savings in transport and facilitating the installation even in reduced and hard-to-access spaces

SILENT TYPE GENERATOR SET

Shunfeng silent type diesel generator sets are equipped with low-noise optimized design and intelligent control system, enabling remote monitoring and automatic start/stop.

Featuring a fully enclosed silent cabinet structure paired with a high-efficiency noise reduction system, our generator sets can significantly reduce operational noise. Whether for outdoor construction or emergency backup power, they ensure stable power supply and environmental friendliness, making your operation more convenient and efficient.
